Professional Summary

Detail-oriented L1 Technical Support / ISP Support Executive with hands-on knowledge of Fiber (FTTH/ GPON), Billing & Customer Portal, ODN troubleshooting, and Helpdesk operations. Experienced in handling browsing, fiber disconnection, abnormal optical power, HD Box, Wi-Fi, VOIP, billing, and tax-related queries following SOPs and QA standards. Strong command of customer communication, verification procedures, and ticket escalation workflows.

Education

Kohat University of Science and Technology, Pakistan (2017-2021)

BS Computer Science — (CGPA: 3.60/4.00) Thesis

(Final year project 2017 – 2021)

IoC-Chatbot: IoC-Chatbot is a real-time communication system designed for students and advisors at the Institute of Computing, KUST. The goal of the project is to streamline interaction, automate academic assistance, and provide a chatbot based fallback when advisors are offline. The system enables messaging, announcements, file sharing, profile management, advisor search, and multilingual support. Built using Flutter, Dart, Firebase, and Python/Dialogflow, the project aims to enhance academic communication efficiency and reduce response delays in student–advisor workflows.

Professional Experience

L1 Technical Support Engineer – Sybrid (Stormfiber Campaign) (01/2026 - Present)

- Delivered complete Level-1 support for Fiber, Wi-Fi, browsing, and IPTV issues, ensuring quick and accurate resolutions.
- Diagnosed abnormal optical power, fiber bends, connector faults, and ONT/OLT signal issues using internal monitoring tools.
- Handled customer billing queries, tax breakdowns, payment statuses, and guided users on the self-service portal.
- Performed policy-based customer verification and maintained clear, QA-compliant notes for every interaction.
- Managed high call volume while maintaining professional communication, patience, and technical accuracy.
- Resolved 84–110 calls per shift

Intern — Brandora (06/2025 – 12/2025)

- Designed social media posts, banners, and infographics.
- Built UI/UX mockups in Figma
- Collaborated using ClickUp, Asana & Discord.

Project Manager — Uzair Tech (01/2023 – 03/2024)

- Managed 16-25 software projects.
- Built automated BI dashboards in Power BI.
- Converted Excel reports into interactive dashboards.

Intern — Bank of Khyber (06/2022 – 12/2022)

- Performed biometric verification and form processing.
 - Assisted police department officers with onboarding.
-
